

Student Software Engineer Intern (Madison, WI)

Quest Software is looking for talented and highly motivated students to help develop software.

You will be asked to help develop infrastructure, regression tests and unit tests for complex e-mail migration products. You will learn the ropes of commercial product development. You will work with senior developers and software testers to translate requirements into tests.

We hope to find dependable, smart people to work in our relaxed work environment in Madison, Wisconsin, 10-20 hours, per week. Hourly rate based on your experience.

Requirements:

- * Desire to focus on the Microsoft development platform
- * Development skills in C++
- * Attention to detail
- * Excellent organizational skills
- * Verbal and written communication skills are required

Prior experience with e-mail and directory servers a plus.

To apply, contact Tom Willis (tom.willis@quest.com) by email, or call (608) 662-4400.

Location: 525 Junction Road, Madison, WI. (Bus stop in front)
