Web Programmer / Analyst Internship

INTERNSHIP: Develop, troubleshoot, debug, and implement software code for web applications. Relational database concepts and object oriented development knowledge required. Experience in HTML, DHTML, JavaScript, XML, CSS, PHP, MySQL preferred. Flash, ActionScript 3.0, ASP.Net, and C#.Net experience a plus.

YOU: Qualified applicants will be team players who can manage their own time/workload efficiently to meet deadlines with minimal supervision from the Project Manager and Lead Programmer. Ideal candidates will be fast, organized, detail-oriented, and will be thoughtful about their work and curious about emerging trends. All candidates should have high standards, and will be committed to doing things properly, even if it means going the extra mile. Must be able to work on site.

US: We are an integrated brand management and marketing firm. Our charge is to find, design and deliver the most powerful interactions between consumers and our clients' brands.

APPLY: Please submit a current PDF resume to careers@hiebing.com. No prior work experience required. Work 15-20 hours per week on site. Start date negotiable. Potential for pay, commensurate with experience.
