

**Programmer**  
**Center for Limnology, University of Wisconsin-Madison**

10-20 hrs/wk. \$11-\$13/hr. Flexible hours. Want a motivated and experienced programmer to work on an interdisciplinary team developing a web interface to real-time and archived data from instrumented lake buoys. The project has engaged citizen scientists in the design process to further the education and outreach mission of lake associations. Knowledge of Java/JSP and web interface design is necessary; experience with XML and OWL, developing on Linux, and configuring/administering Apache and Tomcat is desirable. We require good communication skills and the ability to work effectively as a team member. Send resume to apply. Barbara Benson, Center for Limnology ([bjbenson@wisc.edu](mailto:bjbenson@wisc.edu)). Applications accepted until October 11, 2009.
