

Since its founding in 1978, Ultratec has proven itself as the world-wide leader in developing new technologies for the deaf and hard of hearing population. By putting the customer's needs first, we have grown to become the world's largest manufacturer of TTYs. Today, our TTYs are recognized worldwide as the standard for excellence in text telecommunications.

Ultratec's most recent endeavor, the Captioned Telephone (CapTel), continues to demonstrate our proven track record of revolutionizing the industry with cutting edge products that transforms the lives of individuals around the world.

Ultratec, Inc., currently has a **paid internship opening during the 2009 school year for a Software Engineer/Web Developer**. This position is an excellent opportunity to gain technical expertise with front and back end development of software applications. You will gain real life experience in a business environment that will have an impact on Ultratec's current and next generation of systems and products. The software engineer will be responsible to design, code, test debug, and document applications to satisfy technical specifications.

Ideal candidates are juniors, seniors or graduates in a technical discipline. Candidates must have a working knowledge in **ASP, ASP.NET, JavaScript, MySQL/SQL, and VB/VB.NET**. Candidates must also demonstrate a strong academic record, problem solving skills, analytical thinking skills, multi-tasking skills, written and verbal communication skills. Flexible schedule with 15+ hours a week, Monday thru Friday, during normal business hours. Internship duration for at least 3 months, but could be extended.

If you are interested in this position, please send inquiries, cover letter, and resumes to:
