At Liberty Mutual, technology isn't just a part of our business, it's what drives us forward. We deliver our customers peace of mind every day by helping them protect what they value most. Our passion for placing the customer at the center of everything we do is driving a transformational shift at Liberty Mutual. Operating as a tech startup within a Fortune 100 company, we are leading a digital disruption that will redefine how people experience insurance.

About the Role

As a Technology Intern or Co-op, you will be embedded within our tech teams, learning and applying valuable skills. The typical intern/co-op student is an undergraduate who will handle projects or work normally performed by an entry-level, professional employee. Assignments can include:

**Software Development** - As a Software Developer Intern you could work on projects at all stages of the development lifecycle, from reviewing user requirements, to design, to construction and test, to deployment.

**Data Analytics** – In Data Management you could perform design activities and maintain documentation while building technical expertise in data warehousing, data mining, data modeling, methodologies, techniques and tools.

**Information Security** – In Information Security you could test and implement appropriate security methods and control techniques such as firewalls, intrusion detection software, data encryption, data backup and recovery.

Our Interns work alongside technical professionals to develop business solutions using emerging technologies, including cloud, HTML5, Java, CSS3, SAS, JEE, .NET, Teradata, Hadoop, NoSQL, Informatica, business intelligence, responsive design, and mobile apps to create new business solutions. You will also have the opportunity to network with other Interns through a variety of activities.

To learn more about our opportunities and what it is like to work in Tech at Liberty Mutual, you can visit our recruiting site at techcampus.libertymutual.com.

Work Environment

In our Technology Department our work environment is focused on collaboration and team work. Our teams work closely together to deliver quality products and drive results. The industry changes quickly, so we are looking for candidates who can respond to change, pick up new technologies quickly and adapt to changing requirements and different management approaches. Most importantly, you'll be engaged in stimulating and meaningful work and enjoy an environment that demonstrates a commitment to treating everyone with dignity and respect.
