Position:
Software Engineering Intern, Mobile Platform – Spring and Summer 2015

Location:
Madison, Wisconsin

Description:
As a software engineering intern, you will have a unique and valuable part to play in how the future of social crime prevention evolves. We’ll help you gain the knowledge and experience you need, but you will have a project to call your own. You will form a relationship with fellow interns, as well as a growing team that will serve as a mentor.

You will be a member of a team that develops software functionality, user interface, and take charge of other projects. You will not only design and code, but you’ll also have the ability to share ideas.

At Breach Buddy, you will find a creative, fun, and challenging environment, as well as awesome projects that will contribute to a multitude of users who care about social communication and crime prevention.

Qualifications:
• Must be working towards a BA/BS in Computer Science, Software Engineering, or Computer Engineering (software)
• Must enjoy working in a team and collaborative environment

How to apply:
Please send your resume to careers@breachbuddy.com. We will consider resumes until June 2015.

About Breach Buddy:
Breach Buddy is a tech startup focusing on crime prevention on a social and interactive platform. Our mission is to give people the power to prevent cyber and physical crime in their own neighborhood. Our goal is for people to use Breach Buddy to stay connected and keep each other aware of harmful and criminal activity on the street, and their businesses, or in their own back yard.
