Production Support/Software Engineer

Status: Open
Location: 225 W Washington St, Chicago, Illinois
Business Line: Cortland Capital Market Services LLC
Website: http://www.cortlandglobal.com/

Background:
Cortland Capital Market Services is a financial services company focused on providing fund administration, commercial loan servicing, securitization services and other administrative and analytical services to institutional investors, asset managers and commercial lenders. Based in Chicago, Illinois, with offices in California, North Carolina and New York, Cortland works with major financial market participants including hedge funds, private equity funds, real estate funds, and credit funds that invest in performing and distressed residential and commercial real estate, syndicated bank loan, structured products, derivatives, futures, commodities, and equities.

Cortland places a significant focus on technology. The company builds proprietary software applications and engineers process solutions to improve client engagement, workflow timelines, and quality control.

Position Description:
This position will work directly under the supervision of an experienced technology professional and have heavy interactive exposure to members of the business they cover. Production support is the primary responsibility; however, duties will also include QC testing, ad hoc projects, data analytics, problem solving, bug fixing and new code development. This is a highly visible position that will have a high degree of autonomy and ownership responsibilities. Candidate must show versatility and willingness to handle a number of tasks concurrently.

Experience, Education and Qualifications:
- The position requires strong communication, programming, analytical and problem solving skills.
- A desire and ability to efficiently learn new technology and business concepts is required.

Salary will be based on experience, skill level and education in relation to the position.

Direct experience, knowledge or familiarity with the following is preferred:

- ASP.NET, HTML, JavaScript and CSS
- MVC and WPF or similar interface design tools
- C#
- Silverlight
- Entity Framework
- SQL Server (Complicated Joins, Stored Procedures, Triggers)

Cortland values intellectually curious minded professionals who are interested in aggressively learning and sharing new concepts and skills collegially and independently. For the individual that possess this, consideration will be made for candidates that have technical experience outside of the specifications listed above.

This is a full time position. If interested, please send your resume to katy.messenger@cortlandglobal.com by November 16th, 2014.
