Developer Training Program- Cary, NC

Overview

Join the Deutsche Bank Group Technology Training Programme – where we are looking for developers to build the next generation of banking applications.

Joining our graduate programme, you will benefit from training that develops both your technical and business knowledge. At the same time you’ll work alongside, and learn from, the best. You will start shaping your future from day one, take on increasing responsibility and building applications that will be used by the bank and its clients across the globe.

Your Role?

Today’s banking world is at the forefront of technological advances. At Deutsche Bank you’ll have the chance to apply your ideas to complex challenges and use your passion to drive change and push boundaries.

Deutsche Bank processes 133 transactions every second across 70 countries around the world and our in house development teams are responsible for building the applications that make this happen.

You will find yourself working on a range of projects from multithreaded low latency messaging applications to UI projects for some of our innovative client facing platforms. Whatever you’re working on, you’ll be a key member of the team, sharing your ideas and shouldering real responsibility. Your learning curve will be steep. But you’ll enjoy plenty of support from managers and mentors, as well as unparalleled international exposure.

Your training

Your training starts with an invaluable induction that will give you broad business, technical and product knowledge. Our senior leadership will share their vision for Deutsche Bank with you. You’ll gain a thorough grounding in Technology while a schedule of networking events will help you start building vital business relationships across every division.

After that, expect to benefit from technical and soft skills training that is fast-paced, interactive and ongoing. At the same time you’ll work alongside and learn from talented colleagues in a friendly, supportive culture where people are open and approachable. It’s a combination that will equip you to make an early impact on what we do best – generating inventive, effective solutions for our internal and external clients.
The Location

Joining us in Cary, North Carolina, you’ll launch your career in a true business and technology hub, frequently ranked one of the best places to live in the USA by Money Magazine.

Part of the Raleigh Durham research triangle, which is home to top-tier technology, education and life science institutions; its artists create a bevy of cultural and culinary touchstones; and its storytellers proudly carry on the collective heritage of a rich, historic capital city.

What you’ll bring

We are looking for developers, and as long as you have a good understanding of the logic behind object oriented languages, as well as a passion to problem solve we will teach you all you need to be successful developing in the languages we use. Since we work in an Agile development environment we also place a strong emphasis on teamwork and collaboration as well as the determination to learn quickly and build a long-term career. Add the creativity and intellectual curiosity to solve problems in fresh new ways and you could soon be adding real value to our business.
