Front-End Web Developer

Who are we looking for?
Are you excited about front-end web technologies and UI/UX? Are you looking for an opportunity to learn and be part of dynamic team? We’re looking for a front-end developer to be the next member of our growing team! The work we do is varied and challenging, so you will have the tenacity to take on our increasing list of development projects that benefit students, faculty and staff at UW-Madison and beyond.

Our ideal new team member will be eager to learn and be involved at every step of the project, scoping the best solutions for our clients while working alongside user experience designers, project managers, strategists and other developers to implement, test, and debug.

We’d love you to be the kind of person that thinks through what they’re writing so that it’s testable, accessible, easy to read and built to last. You will have the painstaking attention to detail required to craft a design in code, plus the empathy with audiences needed to make user interfaces that just work.

As an entry-level position, you’ll have an opportunity to learn while you work as part of a team of developers, helping customers to design, build, and deploy web content using WiscWeb CMS, our campus-wide content management system backed by OpenText (see http://www.doit.wisc.edu/wiscwebcms). Additional responsibilities will include working on front-end development tasks associated with application development projects as well as an opportunity to learn and grow in the web development space.

Must have:
- The ability to work as part of a team and individually
- Good problem solving and communication skills
- The desire to learn new things
- Working knowledge of front end technologies such as: HTML; CSS; Javascript; and Responsive Frameworks

Bonus points for:
- Knowledge of front-end and JavaScript frameworks such as AngularJS, Bootstrap, or Backbone.js
- Experience working with server side technologies such as Java/.NET/PHP
- Familiarity with developing for web content management systems
- Experience with version control systems
- Experience with Photoshop and/or Illustrator

Here’s what we need from you:
- Cover letter that explains why you want to work with us
- Your resume that outlines your experience and skills
- If available, links to where we can see your work in action
- Application deadline is April 5, 2015, please submit application materials to Bradley Molzahn at bradley.molzahn@wisc.edu
