System Administrator / Operations Engineer

Esker, Inc. is an international software developer and a recognized leader in helping companies eliminate paper and improve business processes such as invoicing and order processing with document automation software and services.

We are looking for an Operations Engineer in Madison, Wisconsin to support Esker’s cloud platform. Come work with our international operations team, and put your system administration skills to test in meeting the challenges of a growing platform.

Some of the technologies you will use and support are Windows Server 2008/2012, IIS, Hyper-V, PowerShell, JavaScript, Red Hat 6/7, PostgreSQL, EqualLogic SANs; and network gear from Dell, HP, FS, and Juniper. Experience with all of these technologies is not required, but a desire to learn is.

Responsibilities

- Administer the Windows and Linux server infrastructure in Esker’s US and French data centers.
- Monitor platform, server, and network performance; and respond to issues accordingly.
- Develop and maintain internal monitoring and management tools used by the team.
- Design and plan infrastructure changes to meet the growing demands of the Esker platform.
- Work closely with our software developers to diagnose and resolve issues.
- Review and implement standard change requests from Esker consultants and support staff.

Desired Skills

- 2+ years Windows Server administration experience.
- PowerShell or other scripting experience, and a willingness to automate your job.
- Familiarity with virtualization technologies such as Hyper-V or VMware; or cloud platforms such as Azure.
- Understanding of TCP/IP and networking fundamentals.
- Linux administration experience considered a plus.
- Degree in Computer Science, Engineering, Information Technology, or related experience.
- Strong communication skills both written and verbal.

If you are a motivated individual looking for professional growth and enjoy the challenge of working in a fast-paced, highly competitive technology marketplace, send your resume and salary requirements to recruiting@esker.com
