Position Description
Software Engineer

Full-time position responsible for collaborating with our design team to design, develop, and modify software systems as needed in order to produce software products that meet customer needs and expectations.

Responsibilities:
• Defining requirements specifications including use cases
• Communicating with architects and developers
• Developing software design specifications
• Coding from design specifications
• Testing from specifications
• Mentoring junior developers on new techniques and tools
• Participating in formulating and carrying out the company’s process improvement initiatives

Qualifications:
• A Bachelor’s degree or higher in Computer Science
• Knowledge of design patterns and design best practices
• Experience in a test-driven development environment
• Experience with delivering applications on desktop, web, and mobile platforms
• Ability to conceptualize and experiment with design solutions and technologies
• Attention to detail
• High level of motivation
• Passion for creativity
• Effective verbal and written communication skills
• Knowledge of implementation languages of produced designs, primarily C#
• Knowledge of implementation technologies such as WPF, SQL Server, and ASP.NET
