Gillware Incorporated specializes in data recovery from troubled hard drives and reliable remote storage solutions for individuals and corporations alike. Founded in 2004 by four recent UW-Madison graduates, Gillware’s original mission was to be the best value in the data recovery industry by providing superior data recovery engineering at an extremely competitive cost. Through years of data loss analysis, Gillware has succeeded in developing a robust and scalable remote data backup solution aimed at helping our data recovery clientele avoid any future data loss. Gillware is at the forefront of failure analysis and data recovery techniques for non-volatile (solid state) storage devices.

**Job Description:** Work with Gillware's experienced software engineers on various long-term projects while learning and developing programming and other technical skills. This will be an 8 month co-op, **starting in August of 2015 and ending in December of 2015**, with the opportunity to work 40hrs/week and earn credit towards your college degree.

**Responsibilities:**

- Development of software for recovery of data from failed storage devices, such as hard drives, flash drives, and memory cards.
- Assist software engineering team to develop, test and deploy new software releases.
- Assist team responsible for developing and implementing online billing and customer service initiatives.

**Recommended Experience/Skills:**

- Pursuing a bachelor degree with concentration in Computer Science or Computer Engineering
- At least two semesters of programming in Java language
- Ability to handle highly confidential information and material
- Ability to work well under minimal supervision
- Ability to communicate, both orally and in writing, in a professional manner
- Strong analytic skills

**Location:** Our office is located at 10 Terrace Court, Suite 103, Madison, WI 53718 in the Baker Tilly building off Hwy 151 (East Washington Ave) past East Towne Mall. There is a bus that reaches our office, however since the ride can be long and the schedule can be sporadic, we recommend you have your own transportation

**To Apply:**
Send resume and a letter of interest to:
