Quality Assurance Engineer @ HealthMyne

HealthMyne, a Madison, WI-based startup, is seeking highly motivated and bright individuals to fill multiple positions in our fast-paced Quality Assurance (QA) environment. QA engineers play an important role in ensuring that HealthMyne delivers the highest quality software to our healthcare provider customers. In addition to exceeding our customers’ requirements, we must also satisfy all applicable FDA regulatory requirements. The individuals will work closely with the development team in understanding customer requirements, developing and executing test plans, building and maintaining testing infrastructures.

Minimum Required Skills:

- Basic programming skills and working knowledge of Office applications
- Working knowledge of Windows and iOS
- String written and communication skills with attention to detail

Additional Desired Expertise:

- Some prior experience with Quality Assurance (QA) particularly with medical software
- Some prior experience in a regulated industry
- Some experience of automated testing framework
- Experience with AWS or similar cloud-infrastructure

Additional requirements:

- Candidates must be authorized to work in the U.S

Application deadline: February 27th, 2015

To Apply: Please send your resume along with the title of the position you are applying for to jobs@healthmyne.com
