Healthcare is unnecessarily complex, healthfinch aims to fix that. We do so by building applications that seamlessly integrate into electronic health record systems to automate pieces of the physician’s day. Our award-winning tool, RefillWizard, has significant traction, but we are not resting on our laurels. Instead, we are quickly building out three additional applications and the platform we need to support them. You will be leading our front-end development effort by designing and building scalable user interfaces. This is a full-time position.

YOU IS 2+ YEARS OF PROFESSIONAL EXPERIENCE WITH:
- HTML/CSS, Javascript
- Javascript MVC frameworks (Backbone, Angular, etc.)
- Working with RESTful web services
- Front-end frameworks (Bootstrap, etc)
- Rapid, iterative, low and high-fidelity prototyping
- CSS pre-compilers (SCSS or LESS)
- Source control with Git

OTHER REQUIREMENTS:
- Strong written communication and collaboration skills
- Knowledge of best practices for responsive design
- Wire-framing and prototyping
- Some familiarity with Ruby on Rails a plus
- B.S. in Computer Science or related field

NICE TO HAVE:
- Design skills or a good design sensibility
- Experience creating user stories and turning those stories into finished workflows

BENEFITS:
- Competitive Salary
- Health Insurance
- Equity
- Your favorite drink always in the office
- Relaxed work environment

HOW TO APPLY:
To apply, send us an email at jobs@healthfinch.com and attach your current resume in HTML, Word, or PDF form. Also include a cover letter about why you think you’d be a good fit for healthfinch (we’ll give you a hint, our spirit is to "solve, with a dose of awesome").
