We’re looking to add full-time software engineers to our modest development team to help us scale out to more client sites, develop and maintain integrations with many large EMR products, and improve the quality of our product offerings. We work with Ruby on Rails on existing apps, but believe in the philosophy of using the best tool for the job.

MINIMUM QUALIFICATIONS & COMPETENCIES:
• A minimum of 3 years experience working as an application developer or software engineer
• Interest in working with a small development team at a start-up
• The willingness to identify projects, dive in head first with minimal supervision and see them through to completion
• Strong communication skills
• Strong experience with modern web development including HTML, CSS, and JavaScript
• A good understanding of MVC design patterns
• Knowledge of SQL and Relational Database Systems
• A passion for perfecting the practice of healthcare through IT

BONUS
• Experience working with:
  • Git, Ruby, JavaScript, RSpec, Cucumber, Ruby on Rails, jQuery, .NET (SQLServer, C#, MVC), Cache and MUMPS
• Located in Madison
• A GitHub profile you can send us

BENEFITS
• Competitive Salary
• Health Insurance
• Equity
• Your favorite drink always in the office
• Relaxed work environment

HOW TO APPLY
To apply, send us an email at jobs@healthfinch.com and attach your current resume in HTML, Word, or PDF form. Also include a cover letter about why you think you’d be a good fit for healthfinch (we’ll give you a hint, our spirit is to "solve, with a dose of awesome").
