Integrated Vital Medical Dynamics, LLC

Software Developer

We are iVMD, a healthcare software company committed to improving the lives of patients and those that care for them. As a member of our team, you will have the opportunity to build software that will directly impact the practice of medicine. We need committed team members who are willing to pitch in on a variety of projects as the company grows to help make our software available to healthcare professionals across the country.

Qualifications

- B.S. or M.S. degree in Computer Science (or related field with significant study in computer programming)
- Recent graduates encouraged to apply. Healthcare IT or engineering experience preferred.
- Knowledge of python, mobile programming, database architecture design, web, and networking preferred.

Primary Responsibilities

- Help us create a scalable, distributable platform to reach healthcare organizations across the US and beyond
- Create user-friendly graphical interfaces
- Implement cutting edge algorithms to help healthcare teams perform efficiently and consistently
- Create and maintain tablet applications and web services
- Assist with troubleshooting and de-bugging

To apply, email your resume and cover letter to jennifer@ivmedicaldynamics.com.
