Summer Intern and Junior Software Engineers

InstaEDU is an online, on-demand tutoring platform that instantly connects students to tutors from top universities. As more education moves online and video and collaboration technologies reach a point where they can properly replace in-person learning, we see an enormous opportunity to reach a wider category of students. InstaEDU was founded by three Stanford grads, and our close-knit team is now pushing past 20 members.

**Junior Software Engineer** (Full-time)
We're looking for passionate junior engineers that are excited to get hands-on experience building importance features and influencing key product decisions at InstaEDU. Great candidates will have a strong background in Python programming, and proficiency in HTML, CSS and Javascript (bonus points for Django, SQL/PostgreSQL, JQuery and/or Redis/NoSQL!).

**Software Engineering Intern**
This summer, we're excited to add interns to our team. We're looking for strong engineering students who are excited to make an impact within a small eng team and see the day-to-day workings of an early stage startup. A great candidate will be familiar with Python, HTML, CSS, and Javascript (bonus points for Django, SQL/PostgreSQL, JQuery or Redis/NoSQL!).

If you're interested in joining the team, please email jobs@instaedu.com with your resume, cover letter, and any projects that you're proud of. If you have any questions or would like to learn more, please feel free to email me at kate@instaedu.com. Looking forward to hearing from you all!
