INTERNSHIP FOR PROGRAMMER/SOFTWARE DEVELOPER

La Comunidad News www.wisclatinonews.com is Wisconsin’s premiere newspaper serving the Latino community. Our mission is to empower the Latino community by providing them news and information that has a direct impact in their lives. For the past 25 years La Comunidad News has produced a newspaper and established long term relationships with community based organizations that want to connect with the fast growing Latino community. Currently, we provide two platforms, print and web. We focus on the local flavor and content of our Latino community. We also provide promotional opportunities for our partners as well as employment opportunities for our readers.

Job Description La Comunidad News is looking for highly motivated and talented individuals to join the fast-paced software development team in Madison Wisconsin. As a Software Developer/programmer, you will create state of the art multimedia models and systems designed to enhance the publishing experience of La Comunidad News and its partners. Along with other top-caliber developers, you will apply test-driven development using database language similar to MySql and PHP in multiple layers, including the user interface, business domain, and data access. You will also be responsible for maintaining existing modules and helping address internal client issues as necessary. Opportunities for technical career advancement abound. La Comunidad News’ work environment facilitates continuous learning, including in the area of multimedia publishing, Apps development and supports employees eager to channel their creativity into innovative software development and ancillary applications. Working with the best developers, in an agile environment, will sharpen your professional skills. Spanish language skills helpful but not required.

We provide a $13 per hour internship compensation and the opportunity to work in a fully bilingual environment (Spanish and English). Qualifications to be a Programmer/Software Developer, you must have a good understanding of object-oriented analysis and design and the software development process, descent coding and debugging skills, and a passion for contributing in a group environment. Knowledge of relational databases is highly desired. Ideal candidates must be in the process of working towards a bachelor’s or graduate degree in related field. In addition, candidates must enjoy challenges and demonstrate initiative to solve tough problems and produce results. Strong verbal and written communication skills are a must
for working with journalists, developers, bloggers, graphic designers, financial accountants, and managers as a team. Assignments are set in a 6 months term. 15-20 hours per week.

To Apply  Send cover letter and resume to publisher@wisclatinonews.com by January 1, 2016 and call 1-608-237-1557 to set up appointment.
