WEB DEVELOPER

Job Description:

The Internet Creative department has an immediate need to bring on an experienced Web Developer to help our Internet Production team and support projects for www.landsend.com. You will be responsible for supporting a variety of projects within Creative and User Experience including the look and feel of the site, interactive projects, landing pages, and mobile experiences.

Responsibilities:

- Technical design and development – This role will be responsible for the independent creation of technical solutions and design, and delivering that solution through documentation and code to the website platform.
- Delivery, testing, and deploy – This role is a member of an integrated team, and will be involved throughout all stages of the delivery process including deployment, testing and support.

Required Skills:

- Experience in and passion for web development and design.
- Bachelor’s degree in a computer-related field or equivalent experience and 1-2 years of proven technical experience in a front-end development role.
- A strong understanding of modern front-end and web programing languages – to include HTML5, CSS3, JavaScript, JavaScript Frameworks (jQuery, Grunt, Angular), and Velocity Templates.

Company Description

*Lands’ End* is a classic American lifestyle brand with a passion for quality, legendary service, real value and a simple two-word promise to stand behind everything it sells: Guaranteed. *Period.* Lands’ End delivers timeless style for Men, Women, Kids and the Home. With over 50 years of experience, Lands’ End is renowned for its culture of service for the customer and is recognized as an innovator in the industry. Lands’ End is publicly traded and listed on NASDAQ under the trading symbol (LE).
