Web Programmer

Company name: Dr. Gary Lupyan, Professor in the Department of Psychology

Title of position: Web Application Developer

Pay: $12.00-$15.00/hr

Experience: Both graduate students and undergraduate students are encouraged to apply. Successful applicants will have had experience with JavaScript, HTML5, mySQL, PHP, general knowledge of working in a Linux shell environment, and knowledge of at least one high-level programming language (Python preferred). Django knowledge a plus.

Description: Dr. Gary Lupyan is seeking a Web Application developer for several NSF-funded projects. The projects involve developing web applications for running multi-player 'games' to investigate the evolution of language and transmission of knowledge through social networks. Part of the project requires extending a previously written PHP/JavaScript codebase. The job requires excellent communication, an ability to meet deadlines and to work independently to implement design specifications.

Hours per week: Hours are flexible, but at least 5-10 hours most weeks. Can work from home.

Contact: To apply, please email your resume to Dr. Marcus Perlman (mperlman@wisc.edu), a post-doctoral researcher in Dr. Lupyan’s lab. The application deadline is Feb 20th, 2015.
