SIPS Operator
Space Science & Engineering Center

SSEC is looking for a talented individual who has a passion for science and programming, who has a solid foundation in computer science, as well as software engineering best practices. This position will be working within a dynamic and flexible team environment and must be able to work with minimal supervision and have a demonstrated history of self-motivation.

The successful candidate will work with a high-performance data ingest, archive, and processing system as part of the NASA Science Investigator-Led Processing System (SIPS) for the Atmosphere discipline of the Suomi NPP Science Team.

The successful candidate will either have prior knowledge or demonstrate a willingness to learn about:

- Working knowledge with Linux systems
- Knowledge of programming languages such as Python and Bash shell
- Previous experience with high performance computing systems in a scientific research environment
- Excellent verbal and written communication skills, strong analytical and problem-solving skills, and the ability to work well with others in a dynamic environment
