**Company Name:** Schreiber Foods (www.schreiberfoods.com)

**Company Address:** 400 N Washington Street, Green Bay WI, 54304

**Position Title:** Software Developer

**Seeking:** Computer Science graduates to work a permanent full-time first shift position.

**Application Deadline – February 25th 2016**

**Application Instruction:** Please apply online at the following link:

**Brief Posting Description:**

Come join a talented team where you can make an immediate impact by applying your technical expertise with a growing international organization. The software developer leads or works apart of a project team to develop software applications with varying complexity that meet or exceed internal customer expectations.

**Detailed Description:**

The Software Developer is responsible for application design, implementation, and support in the following areas:

**Technical Skills:**
- Primary Coding Languages: Pl/SQL, Java, .net, C++
- Oracle E-Business Suite
- Tier II/III Support and participate in 24/7 on call rotation

**Leadership Skills:**
- Provide input into team and project meetings
- Provide direct feedback to partners for development
- Participate in hiring processes
- Participate in educational, personal growth, and cross-training opportunities

**Tactical Skills:**
- Initiate, lead, and implement process improvement opportunities
- Provide technical and business information, support, and training to Schreiber Partners
- Follow and demonstrate an understanding of application development processes and methodologies.
- Participate in the physical development of applications through programming, testing, preparing, and documenting
• Participate in the development of general design of information systems
• Follow schedules to meet task deadlines
• Research problems, define changes, prepare, test, and install changes
• Create and update technical design specifications while documenting steps through the development process and create work plans
• Work with Senior Developers to create accurate estimates of hours needed to complete assigned tasks

We're looking for leaders who thrive in fast-paced environments. The successful candidate will have:

• Bachelor's degree in Computer Science, MIS, or Business Administration or related field
• 1-2 years of Software Development experience required, 4-6 years preferred
• Desire to grow and take on new challenges and opportunities.
• Strong ability to analyze user requirements and create designs.
• Full project management and development life cycle experience.
• PL/sql and Java experience preferred
• Strong communication, presentation, and interpersonal skills.
• Able to prioritize and execute tasks in a high-pressure environment.
• Experience working in a team-oriented, collaborative environment.
