JOB POSTING

**Software Developer – Full Time**

Are you an innovator and a problem solver and want to get things done? RateLinx is a thought-leader in customized shipping and logistics management software. The Software Developer works closely with the Software Architect to develop and maintain the standard products our customers and employees use every day. We are looking for someone who will focus on developing, maintaining, fixing and enhancing the pre-audit system and the Rating Web Service.

**Responsibilities:**
- Be a resource to internal staff as it pertains to the pre-audit system and the Rating Web Service.
- Develop, enhance, fix and maintain existing software applications after handoff from the Software Architect.
  - Develop, enhance and maintain the pre-audit system.
  - Enhance and maintain the data entry system.
  - Test changes and enhancements to standard product.
  - Make changes to code based on testing results.
- Perform Web Service development on RateLinx’s standard product.
  - Add new carrier rating.
  - Maintain existing carrier rating in the Rating Web Service.
- Perform pre-audit Web development.
- Perform dashboard Web development.

**The ideal candidate will have:**
- Minimum of Associate Degree in Computer Science or related field.
- One year software development experience preferred.
- Ability to demonstrate proficiency in the use of computer hardware (keyboard and monitor), Microsoft Word and Excel, and RateLinx systems and programs.
- Experience with Microsoft SQL Server, Crystal Reports, C# and Visual Basic.
- Excellent problem solving skills, particularly solving problems, issues or concerns before they occur or become critical.
- Desire to enhance existing technology to exceed customer expectations.

**Hours/Benefits:**
- 40 hours/week, 8:00 a.m. to 5:00 p.m. Monday through Friday
- Paid Time Off
- Paid Holidays
- Health Insurance (Medical, Vision and Dental)
- Life and Disability Insurance
- 401(k)

**TO APPLY:**
