We’re looking for a self-motivated, detail-oriented engineer to design, implement, and maintain a scalable analytics pipeline and application to support basketball operations.

**Essential Duties and Responsibilities:**
- Design, implement, and maintain analytics information systems
- Work with internal and external data sources
- Collaborate on research and product opportunities with internal departments
- Other duties as assigned

**Qualifications and Requirements:**
- BS or MS in computer science or related field
- Experience in implementing data ingestion, ETL, and analysis
- SQL database experience, including schema design, query tuning, etc.
- Python development using ORMs such as SQLAlchemy
- Python development using frameworks such as Flask, Django, and Pyramid
- Experience with AWS technologies such as S3, RDS, and EC2
- Experience with Elasticsearch
- Demonstrated high standards of confidentiality
- Excellent interpersonal, communication, and organization skills
- Must be able to work long hours on short notice including weekends and nights
- Position requires full-time residence in Oklahoma City, Oklahoma

This is a full-time, exempt position reporting to the Director of Basketball Operations.

**Qualified candidates should apply online at:**
