What is Singlewire?
We’re a software company. We make InformaCast - great notification software - and sell it to people all over the world. Our employees, customers and partners love us.

Why did we post this job?
Our InformaCast Mobile business is growing, customers want cool new features and we’re building apps to that use Mobile to solve interesting business and notification problems. All that adds up to needing more smart, creative developers. We’re hoping that’s you!

Who are we looking for? Someone who can:

- Run Quality Assurance test scripts – manual and some automated
- Learn the software development process
- Review software documentation
- Be flexible in tools and environment

Stuff that will put you at the top of our list:

- Traditional Languages: Java, JavaScript
- Familiarity with core networking concepts

The person we’re looking for:

- Is awesome to work with and gets fired up about their work
• Takes initiative and can also work with teams
• Has a passion for personal growth
• Is currently in college or recently graduated
• Can deal with change ‘cause we’ve got that!

**Other Stuff You’d Expect to See in a Job Posting:**

• Great place to develop your skills
• Singlewire Software LLC is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, religion, color, national origin, sex, gender identity, sexual orientation, age, status as a protected veteran, among other things, or status as a qualified individual with disability.
