Wanted: Student Developer

Description:
Looking for a Student Developer to join the Menominee Dictionary team. This project consists of several different websites and a database, and is used both to assist those who would like to learn the language, and to compile data for research on the language.

Basic Qualifications:
* Pursuing a CS undergraduate or graduate degree or equivalent at UW-Madison
* At least two core CS classes taken
* Strong problem-solving abilities
* Ability to work independently

Preferred qualifications:
* Knowledge of Ruby on Rails development, or desire to learn it. Consideration will be given to proposals to rewrite the current application if you have significant experience with another web framework.
* Interest in languages/linguistics
* Passion for full-stack web development
* Experience in Javascript, CSS, HTML
* Experience in Unit testing

The primary role of the Student Developer will be to work on front and back end development of the database. You'll be conducting full-stack development on our websites and databases. Some projects include: Automatically classifying similar verbs; upgrading code base to newest versions; adding fields to database for use on websites; designing more attractive websites; maintenance of application.

Pay: $15/hour starting, up to $20/hour

Hours: 5-10/week (possibly more at first); flexible times

How to apply:
Please send your resume and a brief cover letter describing your background and skills to mmacaula@wisc.edu. Once we have reviewed all applications, we will contact finalists for phone and/or in-person interviews. We will use email as our primary form of contact.

Start date:
As soon as possible.

Application Deadline: 11/5/17
