Systems Administrator
Design and manage servers, workstations and network infrastructure to provide critical information technology services while protecting the company from cyber security threats. Working within a small, dedicated team of IT professionals you will help deploy and maintain cutting-edge technologies for virtualization, high-availability and network security.

Specific responsibilities may include:
• Build, deploy and manage servers using cutting-edge configuration management software.
• Analyze network traffic and usage using powerful SIEM tools to remediate cyber threats.
• Utilize advanced virtualization technologies like KVM and LXD.
• Design custom in-house services using Bash, Python, and PHP.
• Ensure compliance with security standards and maintain system security through installation of patches, updates, and blocking of vulnerable services.
• Perform workstation maintenance, security, support and imaging.

Desired Qualifications
• Bachelor's degree in Computer Science, Systems Administration, Network Security, Information Security, or a related field.
• 2-5 years of experience with prior experience in system administration, Linux, or networking preferred.
• Experience with shell scripting, virtualization, or security technologies is a plus.
• Ability to work well independently and in a team environment.
• High level of attention to detail and consistency with the ability to efficiently balance several projects with competing deadlines.

Compensation and Benefits
This is a full-time position with a competitive compensation package as well as excellent benefits, including group health and dental insurance, 401k and paid vacation.

To Apply
Please submit your resume and brief cover letter directly to X-ES through our online application system at: https://www.appone.com/MainInfoReq.asp?R_ID=1565080 by July 31st.
