

Information Management Summer Internship – Thrivent Financial

Are you intrigued by the idea of an Information Technology Internship in an entirely unique Fortune 500 financial services organization, where you will learn and contribute as part of our values-based organization whose purpose it is to serve our 2.4 million members and society by guiding both to be wise with money and live generously?

As an IT intern with Thrivent Financial, you'll have the opportunity to make a difference—personally and professionally.

Our IT Internship Program is designed to give our interns meaningful work in specific functions of the IT environment, to provide a deeper understanding of information technology and its relationship to the greater organization, and to help interns get to know Thrivent Financial better. Our interns are supported throughout with an in-depth IT Onboarding program complete with personal mentors. These internships are considered a key part of our entry level talent program.

The summer of 2016's internship program is a full-time days, 12 week program, and will be located in our Appleton, WI or Minneapolis, MN offices. There are several positions available.

We are looking for people who enjoy creating innovative technical solutions to complex problems. People who are successful in this internship are hard-working individuals who can make a difference. We desire a quick learner who has initiative and drive, enjoys problem solving, and is a well-spoken team player with strong leadership potential.

Our ideal Information Management Engineer Interns are talented in the area of design, development, and support of the elements of our infrastructure, applications, and processes – for the management of Thrivent Financial's information. EIM sub-disciplines would include: data governance, data architecture, data warehousing, enterprise content management, data modeling/analysis/design, quality management.

Additional Requirements:

- Currently pursuing a undergraduate degree in Computer Science, MIS and the like
- Academic status of a Junior or Senior as of Summer 2016
- A track record of excellent academic performance (GPA 3.0+)
- Self-directed, with strong personal management and organization skills
- Strong problem identification and problem solving skills
- Well-developed written and oral communication skills
- High technical aptitude
- Solid team player

Other Important Factors:

- Must be able to intern in our offices full-time during normal business hours
- Must be able to work in the U.S. without sponsorship

Apply with resume & cover letter by November 6 via our website at thrivent.com/careers
