**Contact Information:**

**Name:** Jesse Raasch  
**Address:** 455 Science Drive, Suite 130, Madison, WI 53711  
**Phone:** 608-960-9992  
**Website:** [https://na.baicells.com/](https://na.baicells.com/)

**Description:**

Baicells Technologies is a telecommunications vendor that dedicates itself to connecting rural markets with high-speed 4G LTE broadband networks. Currently, we have a full-time opening for a network engineer in which an individual would be responsible for providing Tier 2 technical support to our clients, setting up wireless testing environments, working on other internal NFV/SDN related projects, and providing technical training to our prospective clients.

The ideal candidate will be one who has strong work ethic and experienced in support and design of wireless internet service provider networks. This would be a great opportunity to work with a new vendor who is disrupting the wireless market with cost-effective and simplistic carrier grade equipment!

**Technical Requirements:**

- Bachelor’s Degree and or equivalent work experience in a technical discipline.
- Basic knowledge of LTE terminology and architecture preferred, but not required.
- Fundamental understanding of TCP/IP networks (subnetting, routing and routing protocols, VLANs, etc.).
- RF engineering experience in radio propagation modeling, path analysis, and frequency coordination.
- Working knowledge of an UNIX / Linux environment.
- Basic knowledge of virtualized server environments.
- Must be able to work both independently and together in a team environment.
- Excellent verbal and written communication skills.

**To Apply:**

Please e-mail a resume and cover letter to [jesse@baicells.com](mailto:jesse@baicells.com) by April 24th for consideration.
