WE International Inc. is a local non-profit organization with an international focus. The mission of our organization is to empower individuals and strength communities in developing nations worldwide through justice advocacy and providing supportive economic and educational services. By working with governments, other NGOs and private organization, these services offer support to victims of poverty and violence with the end goal to transform their lives.

WE International is seeking a talented individual who is passionate about using their solid foundational skills in computer science to impact lives of others. The successful applicant will accept the role as an unpaid intern and fulfill the primary duties and responsibilities listed below.

Degree/Experience Preferred:
- Undergraduate or graduate student currently pursuing a degree in Computer Science, Software Engineering, Graphic Design, or related field
- Experience using Windows 10, HTML, CSS, Javascript, PHP, and XML
- Experience using Wordpress
- Ability to thrive in an independent working environment
- Ability to think creatively
- Ability to analyze needs of the firms and ways those needs can be met

Primary Duties:
- Develop, design, and update the company website and the company’s online store
- Perform necessary coding using HTML, CSS, Javascript, PHP, and XML
- Assist in graphic design and other marketing outlets
- Conduct keyword research to best market our organization and increase accessibility to our website
- Monitor donations and transactions being made through the online store
