Software Developer
Extreme Engineering Solutions is seeking motivated software developers for both front-end and back-end development and support. Working within a small, agile team, you will have the opportunity to create apps that have a direct impact on the company’s engineering, manufacturing and business processes through contributions to the following areas:

• Business Applications – using open source Symfony PHP framework with MySQL database
• Enterprise Applications – using open source Odoo (formerly OpenERP) framework with PostgreSQL database

Specific responsibilities include:
• Analyze business processes to create applications that support end-user needs.
• Consult with stakeholders at all levels of the organization to gather requirements and develop plans for upgrades.
• Utilize your range of programming languages and skills to enhance existing tools or add features that support changing business needs.
• Collaborate with other development team members to create next-generation software solutions.

Desired Qualifications
• Experience with one or more modern high-level programming language (PHP, C#, Python, Ruby)
• Knowledge of object-oriented programming.
• Bachelor's degree in Computer Science or a related field is preferred.
• Skilled at troubleshooting and debugging existing code.
• Able to work effectively both within a team environment and as an individual contributor.
• Knowledge of Event Based Programming, Domain Driven Design, Service Oriented Architecture, MVC and other modern Design Patterns is a plus.

Compensation and Benefits
Extreme Engineering Solutions offers a competitive compensation package with excellent benefits, including group health and dental insurance, 401k and paid vacation.

To Apply
Please apply directly to X-ES through our online application system at the following link: https://www.appone.com/MainInfoReq.asp?R_ID=1504733
