iOS Developer Job Description

We are an early-stage health tech startup looking for a talented and enterprising iOS developer (undergraduate or graduate) to build an iPad and iPhone app supported by an existing API infrastructure. You will be provided with a full set of wireframes and design specifications as well as complete documentation for the internal API to be used by the iOS app. You will be working closely with the chief architect of the API library throughout development. We anticipate this project to be a 4-6 week full-time project. This is a paid contract position with the possibility of full-time employment upon conclusion of the project.

Skills & Requirements

We’d love for you to join our exciting team if you...

- Are fluent in Objective C and/or Swift
- Use Git for source control (GitHub, GitLab, BitBucket)
- Have experience working with REST APIs
- Are fluent in JavaScript/jQuery (not required but nice to have)
- Understand the importance of clean and descriptive code
- Are a good verbal communicator
- Have a strong, self-managing work ethic
- Have a BS/MS in Computer Science or 3-5 years relevant work experience
