Our Company
Informatica is the world’s number one independent provider of data integration software. Thousands of organizations rely on Informatica for maximizing return on data to drive their top business imperatives. To maximize return on data, Informatica increases the value of data by delivering relevant, trustworthy, timely, authoritative, actionable, accessible, holistic and secure data. At the same time, Informatica lowers the cost of data by bringing down business costs, labor costs, software costs, hardware costs and storage costs. With the Informatica Platform organizations can fully leverage their information assets residing on-premise, in the Cloud and across social networks.

Join Our User Interface (UI) Engineering Team
In this role, you’ll be a part of the Web platform UI team is a team of highly motivated engineers with range of experiences. We are responsible for a proprietary framework which serves as a backbone for most Informatica’s web-based products. From user interface to servlets, from modularity to extensibility, collaboration and innovation, the work has it all. It’s challenging yet fun and the must criterion for survival is huge appetite and hunger to learn. Vince Lombardi has aptly said “The difference
between a successful person and others is not a lack of strength, not a lack of knowledge, but rather a lack of will.” Framework has a complex architecture stack built on top OSGi. HTML5, CSS3, JQuery and Java play together in a pluggable manner to provide pure rest based middle tier and common UI patterns/widgets for teams to build their products with.

**Do Work That Matters**

Digital data has forever changed how we interact with each other and shifted how our world works.
