Javascript Developer

Position Summary

Interactive Intelligence (http://inin.com) is looking to start a team in Madison to develop a new client side rendered web application. Team members will likely be working remote from home until the new office has been found, which will likely be in the downtown area. Developers of any experience level are encouraged to apply as long as you are familiar with object oriented programming and have a strong desire to learn new technologies and iterate quickly. This is a full time position.

Major Responsibilities/Activities

Collaborate with the team to develop a beautiful and responsive web site using javascript, CSS, HTML5 and related technologies based on requirements supplied by project management team.

Minimum Requirements

Bachelor’s Degree in Computer Science or equivalent experience
Comfort and understanding of object oriented programming
Basic Javascript, HTML and CSS proficiency
Excitement for learning and working with latest technologies
Positive attitude

Bonus Skills

Advanced Javascript proficiency
CoffeeScript proficiency
Knowledge of algorithms and data structures
