INTERN – UX Designer/Data Visualization

Remedy Analytics is a Milwaukee-based healthcare technology start-up paving the road for patients to pay less for pharmaceuticals. Our proprietary technology and analytics empowers Fortune 100 companies in media, television, government, financial services, manufacturing, and more with actionable analytics and intelligence to save millions of dollars annually. Our technology and analytics drive decisions that reduce pharmaceutical spending.

Remedy’s team of pharmacists, doctors, engineers and industry experts are dedicated to creating new methods for ensuring cost-effective health outcomes. We are looking for Summer 2016 Interns who share this passion. Interns have the opportunity to work side-by-side with our 15-person team across product, marketing, client engagement, and engineering. You will learn about the fastest-growing segment of the healthcare industry and how data analysis is changing the American healthcare system.

We believe in hiring the best and brightest that are driven, take initiative and want to change the world. We are an experienced team of doers. We thrive on problem solving, creative thinking, innovative solutions and relentlessly disrupting the status quo. We want interns who are eager to take on responsibilities above and beyond the ordinary. You will have the opportunity to make a real impact within a start-up company and gain outstanding experience that will benefit you for a lifetime.

The ideal candidate will have the following:
- You’re a doer, a problem solver, obsessed with detail and out-of-the-box thinking challenging the status quo.
- You thrive on autonomy because you can ask effective questions and figure out what you need to do to make an impact.
- You’re an amazing team player that is self-aware and self-direction and eagerly seeks out the next hardest challenge.
- You’re hungry to learn and can demonstrate a solid track record of growing skills in a fast-paced environment.
- You can take into account business objections, client needs, experience principles and innovative best practices to implement design that balances tactical decisions and big-picture strategic thinking.
- You have experience in modern UX design tools, principles and methodology as they relate to data visualization, user experience, and problem-framing.
- You’re highly capable in core design abilities, including composition, typography and color theory.
- Ability to prototype in HTML, Tableau and JavaScript is a plus.
- You love data visualizations and explaining complicated concepts visually.
- You have excellent written and verbal communications skills.
- You have a portfolio demonstrating user-centric design thinking and execution across multiple experience platforms.
- Studying towards your B.A. and/or M.A.

Learn more about us at www.remedyanalytics.com. We’re located in greater Milwaukee and moving to downtown Milwaukee in Summer 2016!

Please send your resume, a cover letter/intro paragraph, and links to your web presence to careers@remedyanalytics.com.
