Title: Student Assistant/Database Support

The UW Population Health Institute’s Evaluation Research Group works in partnership with community, tribal and governmental organizations collaborating through the development, implementation and evaluation stages of their programs. Our projects focus on substance abuse prevention and treatment, obesity prevention, maternal and child health, school-based health, correctional health and related areas. We use a broad range of methods, from qualitative and descriptive techniques to complex experimental and quasi-experimental trials. We also engage in rigorous intervention research design and evaluation.

Website: http://uwphi.pophealth.wisc.edu/

Location: WARF Building, 610 Walnut St., Madison, WI 53726

Salary: $10.00-$15.00/hour

Start date: June 2016

We offer flexible work hours to accommodate class schedules.

Primary Duties:

This position will help create and maintain relational databases for various grant programs using Microsoft Access. These grant programs require that data be collected from multiple sources and combined for evaluation and federal reporting purposes. Duties will include creating new and/or altering existing databases, creating user-friendly data entry forms, and accompanying reports and queries to fit the needs of program evaluators. Duties may also include data entry and importing existing data.

Requirements:
Strong organizational skills are required. Must be self-motivated, enthusiastic, and detail-oriented. Must have experience creating a database, forms, and reports in Access. Able to work 20-40 hours a week during the summer. The candidate will be expected to set up a regular weekly schedule at our WARF location.
